- Construction Services
- Communications

### Commercial >>>

- General Contracting
- New Construction
- Remodeling
- Design Build
- Concrete
- Wood Framing
- Steel Studs/ Sheetrock
- Helical Piles
- Excavation

## Helical Piles

We can competently meet your needs for helical design and installation. Helical piles are a screw-in building and ground anchoring system used for building deep foundations.

Helical piles are used extensively in the oil and gas industry as well as rail, telecommunications, road, commercial & residential building foundations, engineered shoring, tie backs, and foundation repairs.

### Helical Pile Advantages:

- Proven technology
- Speed of installation (shorter project times)
- Reduced cost
- Reduced risk (no excavation hazards)
- Reduction of carbon footprint
- Minimum ground disturbance

### Safety >>>

Four Star Construction is committed to protecting the health and safety of all individuals involved with our business, including outside contractors and the general public. We aim to provide a safe and healthy working environment at Four Star Construction. Our goal is to have no incidents.

### To achieve this goal, we

- Consult openly with our customers, neighbors, employees & partners
- Work with our regulators, industry peers, and other partners to promote responsible health & safety performance
- Strive for continuous improvement

### Communications Department >>>

We've recently had the privilege of adding a Communications Department to our wonderful staff. The department provides support for telecommunications, petroleum, broadcast, and two-way radio infrastructures. Including design, repair, tower inspections, grounding and installation of Scada, Satellite Dish.
